SUMMARY

PHP Developer with 6 years of hands-on expertise in **backend development (Laravel and CodeIgniter**) looking for a transition into a **Full Stack Web Development (MERN Stack)** role **.** Skilled in building **web applications and API development**. Strong problem-solving skills and a passion for writing clean and efficient code.

WORK EXPERIENCE

Laravel Developer | Adox Solutions   **June 2020 - Present**

• Developed and maintained RESTful APIs using Laravel for various applications.

• Created secure and user-friendly admin panels with role-based access control.

• Implemented authentication and authorization using Laravel Sanctum.

CodeIgniter Developer | WebQua Solutions   **June 2017 - January 2018**

• Developed and maintained RESTful APIs using CodeIgniter for various applications.

• Designed and implemented efficient database structures using MySQL.

• Optimized backend performance for speed, security, and scalability.

CodeIgniter Developer | Cybora Solutions   **June 2015 - April 2017**

• Developed and maintained RESTful APIs using CodeIgniter for various applications.

• Ensured proper API documentation for seamless frontend integration.

• Debugged, tested, and optimized applications for smooth performance.

CERTIFICATIONS

Certification in Full Stack Development (MERN) – Entri Elevate   **February 2025 – Present**

Certification in Full Stack Development (MERN) – Illinois Tech US   **February 2025 – Present**

• Cover both front-end and back-end technologies, including HTML, CSS, JavaScript, and React.js for building dynamic user interfaces.

• Explore server-side development with Node.js and Express.js while integrating MongoDB for efficient data storage and retrieval.

PROJECTS

Equip - Heavy Vehicle Rental Web App   **Live Link**

• Designed & implemented a location-based heavy vehicle rental system, allowing users to browse available vehicles.
• Built a dynamic booking system enabling users to select vehicles and specify rental duration.
• Developed & integrated RESTful APIs using Laravel to handle vehicle listings, bookings, and user authentication.

Kotta – Recyclable Waste Selling App   **Live Link**

• Developed a mobile application enabling users to sell recyclable waste from homes, offices, and construction sites.
• Built a secure, scalable backend using Laravel REST APIs.
• Facilitated seamless transactions for scrap materials, including newspapers, plastics, metals, electronics, and appliances.
• Ensured a safe, easy, and reliable user experience for waste collection and recycling.

Najahath – Fuel Station Management System   **Live Link**

• Developed the backend and REST APIs using Laravel for fuel station maintenance and operations.
• Built a system for conducting Surveys and Fuel Maintenance Reports (FMRs) on a daily/weekly basis.
• Enabled seamless fuel station monitoring, data collection, and reporting.
• Optimized backend performance for efficient data handling and real-time processing.

EDUCATION

Bachelor of Technology - Computer Science | College of Engineering ,Vadakara   June 2011 - April 2015

SKILLS

Technical Skills

• **Backend Development:** Laravel, CodeIgniter, RESTful APIs, MVC Architecture

• **Frontend Technologies:** HTML, CSS, JavaScript, Bootstrap

• **Database Management:** MySQL, MongoDB (learning)

• **Version Control:** Git, GitHub

Learning & Exploration

• **MERN Stack (In Progress):** MongoDB, Express.js, React.js, Node.js

• **State Management:** Redux (learning)

• **GraphQL & REST APIs:** Apollo Client, Express.js with GraphQL (learning)
